- affordable housing

EUR 2.65 billion
from European Funds for Eastern Poland

About the programme

The European Funds for Eastern Poland programme offers additional funds (to the support provided under regional and other national programmes) to accelerate the development of the Eastern voivodeships.

The programme will facilitate the consolidation of conditions fostering the competitiveness of the economy and a higher quality of life in Eastern Poland.

Objectives

- supporting the competitiveness and innovation of companies
- increasing the attractiveness of cities and improving the quality of life in era of climate change
- enhanced railway and road accessibility
- socio-economic development through tourism
- more flats with affordable rent below market rates

Measures

Entrepreneurship: support for start-ups, innovation through design change, automation and robotisation, transformation of business models towards a circular economy, loans for investment in tourism

Energy and climate: development of smart energy grids, adaptation of cities to climate change, investment in nature conservation, raising environmental awareness and sustainable urban mobility

Transport: development of trans-regional road and rail infrastructure

Sustainable tourism: creation of supra-regional tourist trails

Affordable housing
